Date: Monday, March 18, 2019 1:49:52 PM

Please do a new report for each event, as I'm getting bombarded for the first one.

Sorry guys. The first reports were position and eta reports. ASPECT has completed 7 passes including over the fire and downwind. No detections have been made. IR imagery is confirming a much larger fire. I will provide an image from yesterday and today so you can see the volume increase in fire.

I have amended the report from last night. Do you want a separate report or just keep adding to the current one?

Give me a few and I will have some photos.
